Onward

With the availability of cutting edge technology, humans are living in higher quality of life than the past. In order to meet such a high standard of living, demands on raw materials sifted from basic materials, such as hot-rolled steel, to elegant and durable ones, like stainless steel.

Cheungkee follows this trend. We used to handle ferrous steel, and now have expanded our business to handle non-ferrous steel including aluminum, copper and stainless steel. We bring the convenience to our customers by provide one-stop-shop service.

Professional

Cheungkee is a well-experienced stockist and has good relationships with the Mills. We not only provide all kinds of materials meeting different standards, but also has the best solution in term of meeting end customers' usage requirements.

Cheungkee also provides shearing and slitting services to shorten our customers' production time.

High Quality Product Line

Product	Type & Size	Major Uses
